

archmodels vol. 68

2009

Have you ever lost your race with time doing visualizations? Have you ever been embarrassed of unfinished renders, spending all night on the modeling process, instead of rendering? If you are an architect, and if you need to work fast but with highest precision, this is the thing for you.

Archmodels volume 68 gives you 50 professional, highly detailed objects of hoods, refrigerators, microwaves, washing machines, panel heating and gas stoves. Why waste costly time for making something that you can have from the best at Evermotion?
